IDENTIFIERS	College Work Study Program; National Direct Student Loan Program; Pell Grant Program; Reagan Administration; Special Educational Opportunities Program

ABSTRACT

The loss in selected federal student assistance programs in the states and by institutional control based on President Reagan's budget request for funding year 1983 is estimated. Funding levels for 1981-1982 for the campus-based programs (Special Education Opportunities Grant Program--SEOG, College Work-Study--CW-S, and the National Direct Student Loan--NDSL) and 1980-1981 funding of Pell Grants are also included. For independent colleges and universities and the students enrolled in them, the cuts in the funding levels for these programs mean a loss of about $543 million and 662,000 awards. The losses at independent schools in six states comprise about 42% of total loss to the independent sector. These states are New York, Massachusetts, Pennsylvania, Illinois, California, and Ohio. The methodology for estimating the losses in the Pell Grants and campus-based programs began with 1980-1981 data on Pell Grants and 1981-1982 data on SEOG, CW-S, and NDSL. These levels were reduced proportionately based on the President's proposed FY 1983 budget. The level for Pell Grants, proposed to be funded at $1.4 billion, was reduced by 40.47%; the level for SEOG, proposed to be zero funded, was reduced by 100%; the level for CW-S, proposed to be funded at $397.5 million, was reduced by 27.20% and the level of NDSL, also proposed to be zero funded, was reduced by 100%. The current funding level and estimated loss for NDSL refers to the federal capital contribution only and does not take into account loans made from the institution's revolving loan funds. Therefore, some loans will still be made, but not with federal capital. Fifty-three pages of funding data are presented. (SW)

c 1982, by the National Institute of Independent Colleges and Universities

INTRODUCTION

This report estimates the loss in selected federal student assistance programs in the various states and by institutional control based on President Reagan's budget request for FY 1983. It also includes 1981-82 funding levels of the campus-based programs (SEOG, CW-S, and NDSL) and 1980-81 funding of Pell Grants which represent the most current information available. It was prepared under the auspices of the State-National Information Network for Independent Higher Education as part of a continuing effort to research and analyze state and federal policies as they effect independent colleges and universities.

For independent colleges and universities and the students enrolled in them, the cuts in the funding levels for these programs will mean a loss of approximately $543 million and 662,000 awards. The losses at independent colleges and universities in six states comprise about 42 percent of total loss to the independent sector in the nation. These states are: New York ($74 million), Massachusetts ($43 million), Pennsylvania ($36 million), Illinois ($29 million), California (27 million), and Ohio ($21 million).

Excluded from this analysis are estimated effects of the President's proposed budget on the State Student Incentive Grant Program (SSIG) and the Guaranteed Student Loan Program (GSL). Because of the wide variety of methods in which SSIG funds are used in the states and how guaranteed loans are made, as well as the lack of appropriate data, it was not possible to report the effects here.

The methodology for estimating the losses in the Pell Grant and campus-based programs began with 1980-81 data on Pell Grants and 1981-82 data on SEOG, CW-S, and NDSL. Those levels were reduced proportionately based on the President's proposed FY 1983 budget. Therefore, the level for Pell Grants, proposed to be be funded at $1.4 billion, was reduced by 40.47 percent; the level for SEOG, proposed to be zero funded, was reduced by 100 percent; the level for CW-S, proposed to be funded at $397.5 million, was reduced by 27.20 percent; and the level of NDSL, also proposed to be zero funded, was reduced by 100 percent.

The current funding level and estimated loss for NDSL refers to the Federal Capital Contribution only and does not take into account loans made from the institution's revolving loan funds. Therefore, some loans will still be made, but not with federal capital.

There were some inconsistencies noted in calculations relating primarily to the proprietary sector. This resulted from the use of two data based programs: "Component Distribution of Allocations: 1981-82 Campus-Based Programs" (July 1981) used for the calculation of dollars

and "Notification to Members of Congress" (August 1981) used for the calculation of student awards.

Appreciation and thanks go to Pat Smith of the American Council on Education for making the Pell Grant data available to NIICU; to Robert Rourke of Gallaudet College and Bruce Lombardi of The George Washington University who assisted in the data analysis; and to William Hudley and Jo-Ann Johnson who labored over the typing of the charts.
